KWALITY[®] 777

Non Whitening Bond

01

Aluminium Channel Letters

Kwality 777 Glue is a high-strength adhesive used to bond aluminum channel letters securely.

02

Acrylic

Kwality 777 Glue is a high-strength adhesive formulated for securely bonding acrylic without whitening.

03

Wood

Kwality 777 Glue is a high-strength adhesive formulated for securely bonding wood with a clear, durable finish.

04

Flex

Kwality 777 Glue is a high-strength adhesive formulated for securely bonding flex with a strong and durable hold.

502 SUPER GLUE

Kwality Cyanoacrylate adhesives

Kwality 502 Super Glue (20 g) Cyanoacrylate Adhesive is a fast-bonding, high-strength adhesive formulated for instant and durable bonding of various materials, including Leather, PVC, Plastic, Rubber & Metal. Its quick-drying formula ensures a secure hold within seconds, making it ideal for household repairs, woodworking, and industrial applications.

KWALITY LOW VISCOSITY 301

Non-Whitening

Kwality LV 301 (20g, 50g) is a premium low-viscosity instant adhesive designed for fast, strong, and precise bonding. Its non-whitening formula ensures a clean, clear finish without residue, making it ideal for delicate and visible surfaces. Perfect for industrial and professional use, it delivers reliable performance with quick curing and superior strength.

MAX BOND

Cyanoacrylate adhesive

Max Bond (12 g) Cyanoacrylate Adhesive is a fast-bonding, high-strength adhesive formulated for instant and durable bonding of various materials, including Flex, Rubber, Plastic, Sunboard, Sunpac, Marble and Ceramic. Its quick-drying formula ensures a strong and reliable bond within seconds, making it ideal for industrial, household, and DIY applications.

FLEX FAST 10g, 12g, 15g, 18g

Instant Adhesive

Flex Fast Cyanoacrylate Adhesive is a fast-bonding, high-strength adhesive formulated for instant and durable bonding of various materials, including Flex, wood, rubber, plastic, Sunboard, Sunpac Marble and ceramics. Its quick-drying formula ensures a strong and reliable bond within seconds, making it ideal for industrial, household, and DIY applications.

KWALITY HIGH VISCOSITY GEL GLUE

Rapid Cure Bonding Adhesive

Kwality HV Gel (50 g) is a high-viscosity cyanoacrylate adhesive specially formulated for strong and precise bonding. Its thick gel consistency prevents dripping, making it ideal for vertical applications and gap-filling on porous and uneven surfaces. Suitable for Acrylic, wood, rubber, plastic, metal, and ceramics, it offers a fast-curing, durable, and impact-resistant bond.

KWALITY HIGH VISCOSITY GEL GLUE

Rapid Cure Bonding Adhesive

Kwality HV Gel (100 g) is a high-viscosity cyanoacrylate adhesive specially formulated for strong and precise bonding. Its thick gel consistency prevents dripping, making it ideal for vertical applications and gap-filling on porous and uneven surfaces. Suitable for Acrylic, wood, rubber, plastic, metal, and ceramics, it offers a fast-curing, durable, and impact-resistant bond.

KWALITY HIGH VISCOSITY GEL GLUE

NEW

Rapid Cure Bonding Adhesive

Kwality HV Gel (250 g) is a high-viscosity cyanoacrylate adhesive specially formulated for strong and precise bonding. Its thick gel consistency prevents dripping, making it ideal for vertical applications and gap-filling on porous and uneven surfaces. Suitable for Acrylic, wood, rubber, plastic, metal, and ceramics, it offers a fast-curing, durable, and impact-resistant bond.

KWALITY HIGH VISCOSITY GEL GLUE

NEW

Rapid Cure Bonding Adhesive

Kwality HV Gel (500g, 1 kg) is a high-viscosity cyanoacrylate adhesive specially formulated for strong and precise bonding. Its thick gel consistency prevents dripping, making it ideal for vertical applications and gap-filling on porous and uneven surfaces. Suitable for Acrylic, wood, rubber, plastic, metal, and ceramics, it offers a fast-curing, durable, and impact-resistant bond.

KWALITY SPRAY ACTIVATOR

Cyanoacrylate Adhesive

Kwality Spray Activator for Cyanoacrylate Adhesive (100 ml) is a fast-drying accelerator that enhances the curing speed of cyanoacrylate adhesives. It ensures instant bonding, reduces blooming, and improves adhesion on materials like wood, plastic, rubber, and metal. Perfect for woodworking, repairs, and industrial applications, this activator increases efficiency by minimizing waiting time and providing a strong, reliable bond.

KWALITY SPRAY ACTIVATOR

Cyanoacrylate Adhesive

Kwality Spray Activator for Cyanoacrylate Adhesive (500 ml/518 g, 1000ml/1000g) is a fast-drying accelerator that enhances the curing speed of cyanoacrylate adhesives. It ensures instant bonding, reduces blooming, and improves adhesion on materials like wood, plastic, rubber, and metal. Perfect for woodworking, repairs, and industrial applications, this activator increases efficiency by minimizing waiting time and providing a strong, reliable bond.

KWALITY DEBONDER PLUS

For Cyanoacrylate Adhesive

Kwality Debonder Plus (100ml) is a specially formulated solution designed to effectively remove cyanoacrylate (super glue). It quickly breaks strong adhesive bonds without damaging surfaces, ensuring a clean finish. Ideal for removing dried glue from fingers, tools, and various surfaces—perfect for industrial and cleaning applications.

KWALITY WOOD FILLER

Instant Wood Filler

Kwality Instant Wood Filler (50g) is a high-performance wood filler specially formulated to fill cracks, gaps, and imperfections in wood surfaces. When mixed with sawdust, it creates a natural-looking finish that seamlessly blends with the surrounding wood. Ideal for furniture repairs, carpentry projects, and woodworking applications, this filler ensures strong adhesion, quick drying, and a smooth, sandable surface.
