

PVC & WPC Board

For Furniture Grade

PVC & WPC boards are composite materials made from a combination of limestone, polyvinyl chloride (PVC), and other chemicals. These boards offer several significant advantages over natural wood, such as being termite-proof, 100% waterproof & fire-retardant.

They are extensively used in various applications, including modular kitchens, wall paneling, wardrobes, window and door frames, bathroom cabinets, railings, and office furniture. **PVC & WPC** boards are especially suitable for areas with high moisture retention.

These materials are as easy to fabricate as wood, allowing for the seamless application for pasting decorative laminates, veneers, acrylic laminates, and PVC laminates. Additionally, **PVC & WPC** boards are optimized for precise carving and shape cutting using CNC router machines, ensuring a flawless finish.

OUR BRANDS

END USE OF THE PRODUCT

Thickness 3 mm to 25 mm
Size in Feet 4 X 8
Density 0.4 to 0.65 kg./M³

Applications
Decorative Grills, Partitions,
False Ceiling, Modular Kitchens,
Office & Home Furniture,
Bathroom Vanities & Advertising
Display Boards
